The Biblical Approach to Horsemanship

This book and method of training riding instructors has opened an international door to teach horse riding with the gospel. This is done by using the different aspects of horsemanship and parables to the spiritual message of the bible.

Many Christian campsites in the USA have welcomed this approach. Suzanne has been invited to run clinics as far away as Latvia

Good basics alone may not guarantee success, but without good basics you are almost guaranteed failure. Practising good basics with a Christian attitude however should be the ideal in riding or any form of sport.
